

Software Version : EasyBuilder Pro V5.03.01.046

## Corrections

### EasyBuilder Pro

1. Fixed the problem where on-screen data stops refreshing as a result of COM Module's failure.
2. Fixed the problem where the "PLC No Response" dialog does not pop up during online simulation even if no PLC is connected.
3. Fixed the problem where projects cannot be successfully compiled if the data security setting for Local HMI has been enabled.

## Drivers

1. Added **KOYO CLICK (Ethernet)** driver.
